Sub: Application for Internship – Computer Engineering

I am writing to introduce myself and express my interest in opportunities where I can apply my skills and grow through hands-on experience. As a third-year B.Tech Computer Engineering student at NMIMS, Navi Mumbai, I am eager to contribute to a team and develop professionally in a dynamic web development environment.

Through my academic journey and projects, I have gained experience in software engineering with a growing focus on web development and backend systems. Projects like a Railway Reservation System in C++ and a Database Management System for a storytelling platform have strengthened my problem-solving skills, while my Crop Recommendation System and AI Chatbot projects allowed me to build responsive web interfaces using HTML, CSS, JavaScript, and Flask.

I enjoy working collaboratively, adapt quickly to new challenges, and communicate effectively within team environments. With strong attention to detail, a proactive mindset, and a passion for continuous learning, I am confident in my ability to contribute meaningfully to web development projects.

Thank you for considering my application, and I look forward to the opportunity to further discuss how my background aligns with your team's goals.

Yours Truly,

Ashika Babydasan
